

GLOSSY POWER

EXPRESS BRIGHTENING TREATMENT

The combination of **Glossy Base** (1) and **Glossy Active** (2) is a comprehensive hair treatment based on active ingredients with low molecular weight, allowing them to perfectly penetrate into hair gaps and areas where the hair structure has been compromised or damaged, filling them, smoothing and brightening.

It restores extraordinary smoothness and natural shine to the hair. It contains natural emollients, cross-linked hyaluronic acid, luminescence, and hydrolyzed keratin, which strengthen the hair. The hair gains hydration and the specially formulated blend softens and makes hair more flexible, giving it a healthy shine.

Usage:

As a separate treatment:

- Wash hair with any shampoo, towel dry.
- Mix an equal amount of Glossy Base with Glossy Active to achieve a uniform gel-cream consistency. (about 10 pumps - each pump is about 1.2 to 1.5 ml of product)
- Apply strand by strand with hands or a brush to previously washed and towel-dried hair. Massage in.
- Leave for about 5 minutes and then rinse thoroughly, towel dry and style as desired.
- There is no need to use a straightener for the treatment, but you can use it to bring out more shine.

Repigmentation service:

- Mix with a brush in a bowl 8/10 pumps of Glossy Base with Glossy Active to achieve a uniform gel-cream consistency and add coloring cream. Apply after washing hair and leave for 2 to 5 minutes.

Coloring service:

- To the mixture of dye and oxidizing cream, add 5 pumps of Glossy Base with 5 pumps of Glossy Active (5 ml + 5 ml) and gently mix. Apply the resulting mixture as a regular coloration and proceed according to recommendations.
