

INSTA LIFT

MODERN AND EXPRESSIVE PROCEDURE HAIR LIFTING.

Innovative treatment formula based on highly concentrated hyaluronic acid along with keratin and moisturizing substances.

The liquid consistency effortlessly penetrates the hair immediately, rejuvenating it, softening it, and giving it an exceptional shine on the surface.

The Instalift treatment is suitable for all hair types, even the most damaged and after chemical treatments, porous, and matte ones. The lightweight Instalift fluid treatment does not weigh down the hair, allowing it to be repeated every **3 – 4 weeks**.

The Instalift lifting treatment **improves the quality of the hair and gives it a silky softness**. Hair is easier to comb, dry, and style. They reflect light intensely, giving them a mirror-like shine.

Instalift is also available in Platinum version. Enriched with cool pigments, it perfectly neutralizes warm, unwanted tones on bleached hair.

METHOD OF USE:

Wash hair

with any shampoo, towel dry.

Apply 20 to 40 ml of INSTALIFT product to the hair (depending on the length of the hair), distribute evenly on the ends and along the length of the strand, massaging into the hair and comb through with a wide-tooth comb.

Leave it on for about 5 minutes, then rinse thoroughly, towel dry, and style as desired.

There is no need to use a straightener for the treatment, however, you can use it to enhance the shine.

To maintain the effect of the treatment, recommend to the client the use of the appropriate shampoo from the Diana Beauty & Creative brand, from the InstaGlam series.

The InstaLift treatment can be performed separately as an express therapy or, which is more recommended, as a complement to coloring. InstaLift adds depth to the coloring, closes the hair cuticle, and helps the color maintain its radiant shine for longer.

Product for professional use only.
